

Sponson kit – STC 10065501

Designed to install a new sponson on the AS332. The system to be installed is aimed to provide an external cover for hydraulic landing gear system and to provide positioning and electrical provision for position/anticollision lights.

Sponsons

p/n	TPS332-00100-1000
Material	Composite
Dimension LxWxH	98.2 x 62.4x 57.7 cm
Structure Weight	2 X 11 kg

Key Features

- Cover for hydraulic landing gear system
- Electrical system for anticollision light
- Smaller than standard helicopter sponson
- Easy connection to the helicopter structure:
tight connection and a fine positioning of the sponson during assembly;
- High stiffness and strength properties without increasing weight.

Applicability on:

- Helicopters AS 332
