

## UPS Uninterruptible Power Supply

TPS Aerospace's UPS is a heavy-duty system designed to sustain delicate avionic system from onboard power system failures.

3 large sealed Gel VRLA batteries, chosen for their excellent resistance to shock and vibration, as well as their maintenance-free nature, form the heart of the system.

A power management module interfaces with the batteries and the external power supply to ensure optimal charge and discharge performance.

UPS		Key Features
<i>p/n</i>	TPSUPS-001-00	<ul style="list-style-type: none"> <li>➤ 46 Ah capacity.</li> <li>➤ 40A max continuous current.</li> <li>➤ 60A peak current.</li> <li>➤ 24VDC input/output.</li> <li>➤ N°3 Gel Lead-Acid batteries.</li> <li>➤ Rugged steel construction.</li> <li>➤ Crash-safe.</li> </ul>
<i>Material</i>	Aluminium xxxx	
<i>Dimension LxWxH</i>	65.5 x 27.0 x 22.0 cm	
<i>Structure Weight</i>	51 kg	

### Applicability on:

- Helicopters
- Airplane
